Innovative Door Builder on page 47!
Build a door with a photo of your home.

Front Cover

Thank you to our Martin Door customer in Erda, Utah for this gorgeous shot of his garage doors: Steel Pinnacle 119X/Custom Powder Coat. We appreciate the opportunity to take photos of our installed doors on customer homes.

If you would like us to photograph your Martin Door, please send a request (U.S. addresses only) to our dedicated customer service team: info@martindoor.com

**LOOKS
LIKE WOOD,
BUILT LIKE WOOD...
BUT COSTS
UP TO
40% LESS!**

- Martin's steel garage door looks exactly like wood, without the upkeep or cost.
- Stiles and rails are bolted together, not glued, not overlaid, so they can not delaminate.
- True 3/4" panel depth.
- Now with angled stiles.

POWDER COAT FINISHES: METALLIC

Martin's textured metallic powder coat finishes are long-lasting and durable.

- Color samples will vary due to printer's color adjustments. Please see physical samples before ordering door.
- All steel and copper doors have an embossed texture, unless ordered smooth.
- Aluminum doors are smooth.
- Insulation is required on powder coated doors.

* May require additional lead time.

Spring

Center-mount springs have a high risk of explosive discharge due to spring torque. Martin's side-mounted Safety Spring system helps prevent accidents from happening. Side or center-mount springs are available on all doors.

Track & Roller

Martin hardware comes with hemmed edges and reduced hole size to help prevent injury. Martin rollers have 11 sealed ball bearings, and are pre-lubricated for smooth use. Roller shields are used for additional finger safety.

Hinge

Martin's premium low-profile safety hinge reduces the gap between sections.

Lift Cable

Martin's thicker 1/8" cable protects from breakage, and is located INSIDE low-clearance track, making your door safer.

Lock-On Bottom Bracket

If screws are removed while the springs are wound, the bracket will not move. Other brands do not have this safety feature.

Low Clearance

Can be cut to fit any size opening.

*see manufacturer's written warranty for details and limitations.
 † Some doors require only one spring due to weight.

MARTIN ADVANTAGE

How do other garage doors compare to Martin?

These upgrades are included on most Martin garage doors, and are usually an up-charge or not included at all on other companies' doors.

Safety

Items that help protect you from injury

1. Side Spring Anchor Bracket
2. Acrylic Panes for Windows (optional)
3. Rolled Edges on Tracks
4. Rolled Edges, Stiles / Sections
